

## Private Property Thornlands, Qld

*We are very fortunate to be advised by Bernard Rankin of Clayton Engineering – BioRemedy, regarding how to maintain the health of our acreage waterways and dam. Bernard has a wealth of knowledge to share and willingly provides us with advice that maintains the health of our waterways and has led to the eradication of some clogging weeds. Bernard shares our views on protecting the quality of the water to ensure the prolific wildlife... turtles, fish, eels and birds that frequent the waterways, continue to inhabit the waterways and visit. Bernard's advice on what chemicals we can safely use, and how best to do this, is invaluable. Thank you, Bernard, for making the task of maintaining our property so easy. We couldn't do it without you and Clayton Engineering – BioRemedy.*
